

FastAPI Practical

Student Name: Usharani

Objective

To install, create, run, and test a basic FastAPI application using Python.

Step 1: Install Required Packages

```
pip install fastapi uvicorn
```

Step 2: Create the Application File

```
from fastapi import FastAPI

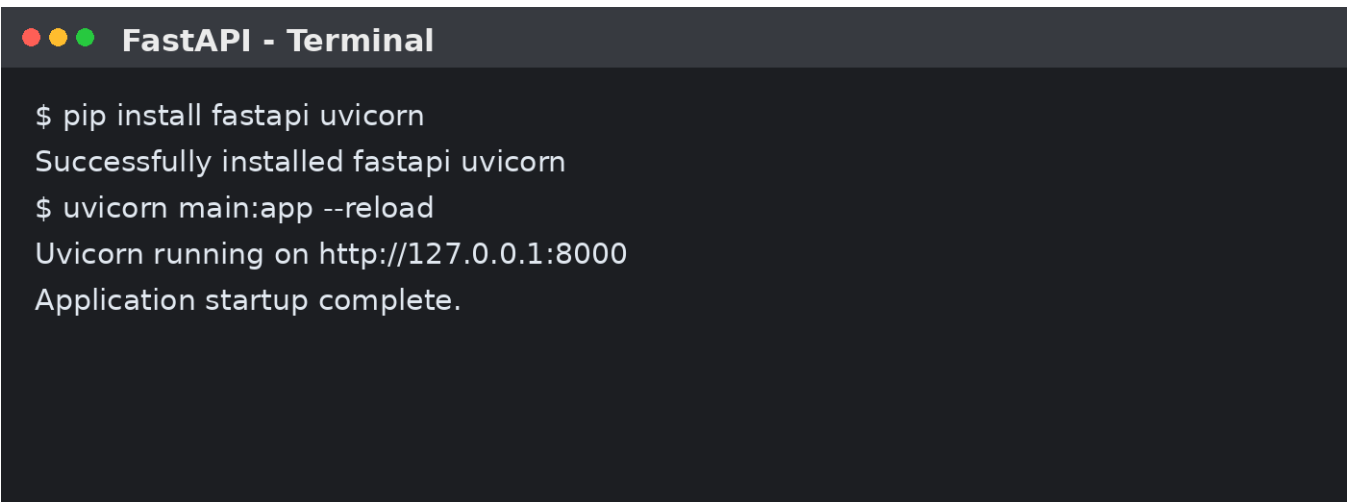

app = FastAPI()

@app.get('/')
def home():
    return {'message': 'Hello, Usharani! FastAPI is running.'}
```

Step 3: Run the Application

```
uvicorn main:app --reload
```

Screenshot 1: Running the application in the terminal

A screenshot of a terminal window with a dark background. The title bar at the top shows three colored circles (red, yellow, green) followed by the text "FastAPI - Terminal". The terminal content shows the following commands and output:

```
$ pip install fastapi uvicorn
Successfully installed fastapi uvicorn
$ uvicorn main:app --reload
Uvicorn running on http://127.0.0.1:8000
Application startup complete.
```

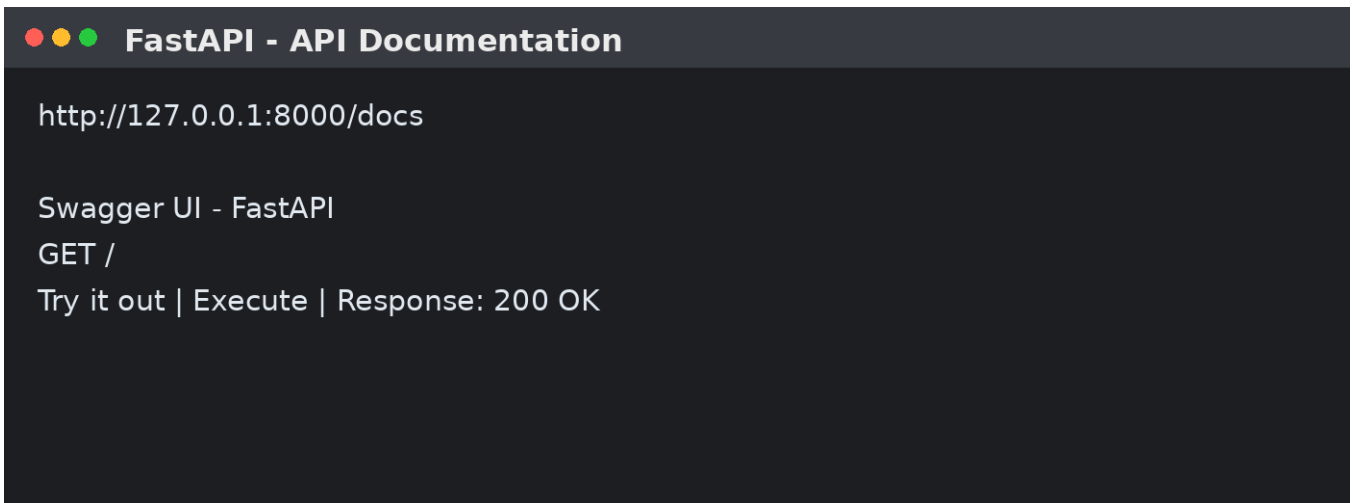

Screenshot 2: Application output in the browser

● ● ● **FastAPI - Browser**

http://127.0.0.1:8000/

```
{"message": "Hello, Usharani! FastAPI is running."}
```

Screenshot 3: API testing / documentation output

Result

The basic FastAPI application was created and executed successfully, and the output was verified.
