

Flask Practical

Student Name: Usharani

Objective

To install, create, run, and test a basic Flask application using Python.

Step 1: Install Required Packages

```
pip install flask
```

Step 2: Create the Application File

```
from flask import Flask

app = Flask(__name__)

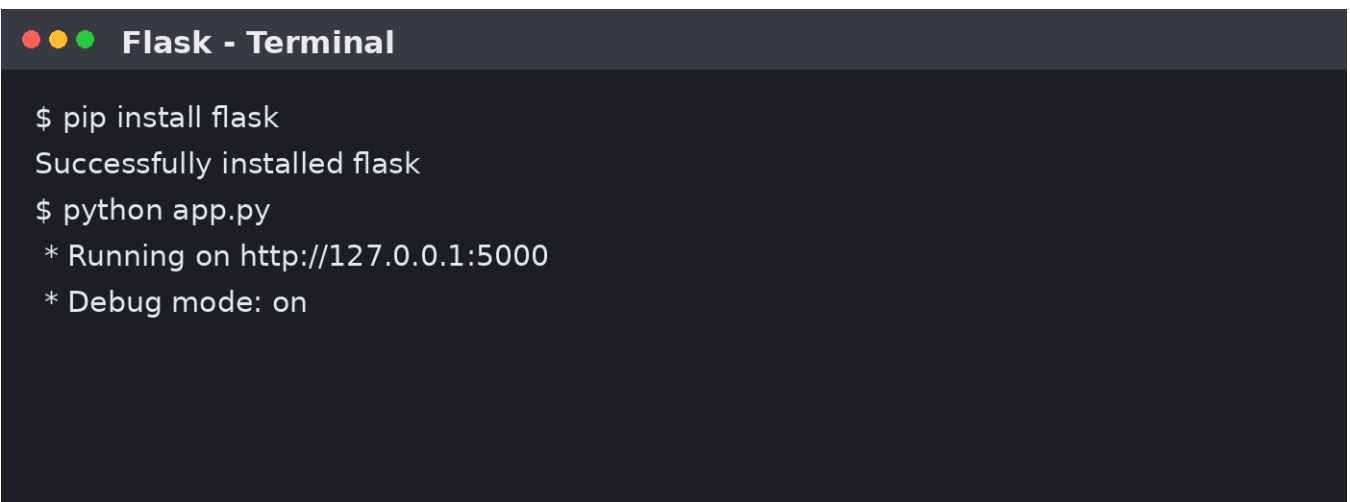

@app.route('/')
def home():
    return 'Hello, Usharani! Flask is running.'

if __name__ == '__main__':
    app.run(debug=True)
```

Step 3: Run the Application

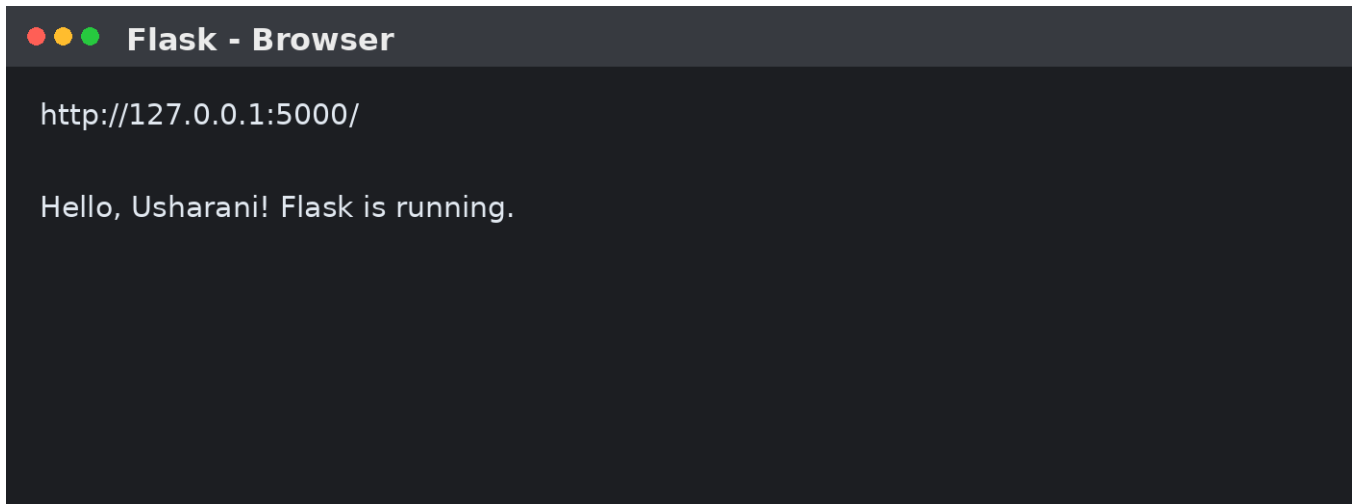

```
python app.py
```

Screenshot 1: Running the application in the terminal

A screenshot of a terminal window with a dark background. The title bar at the top shows three colored circles (red, yellow, green) followed by the text "Flask - Terminal". The terminal content shows the following commands and output:

```
$ pip install flask
Successfully installed flask
$ python app.py
* Running on http://127.0.0.1:5000
* Debug mode: on
```

Screenshot 2: Application output in the browser

Result

The basic Flask application was created and executed successfully, and the output was verified.
